

Induction Bar End Heating

Compact Turnkey Unitized Induction Forge Heating System

Air-Cooled Power Supply Technology

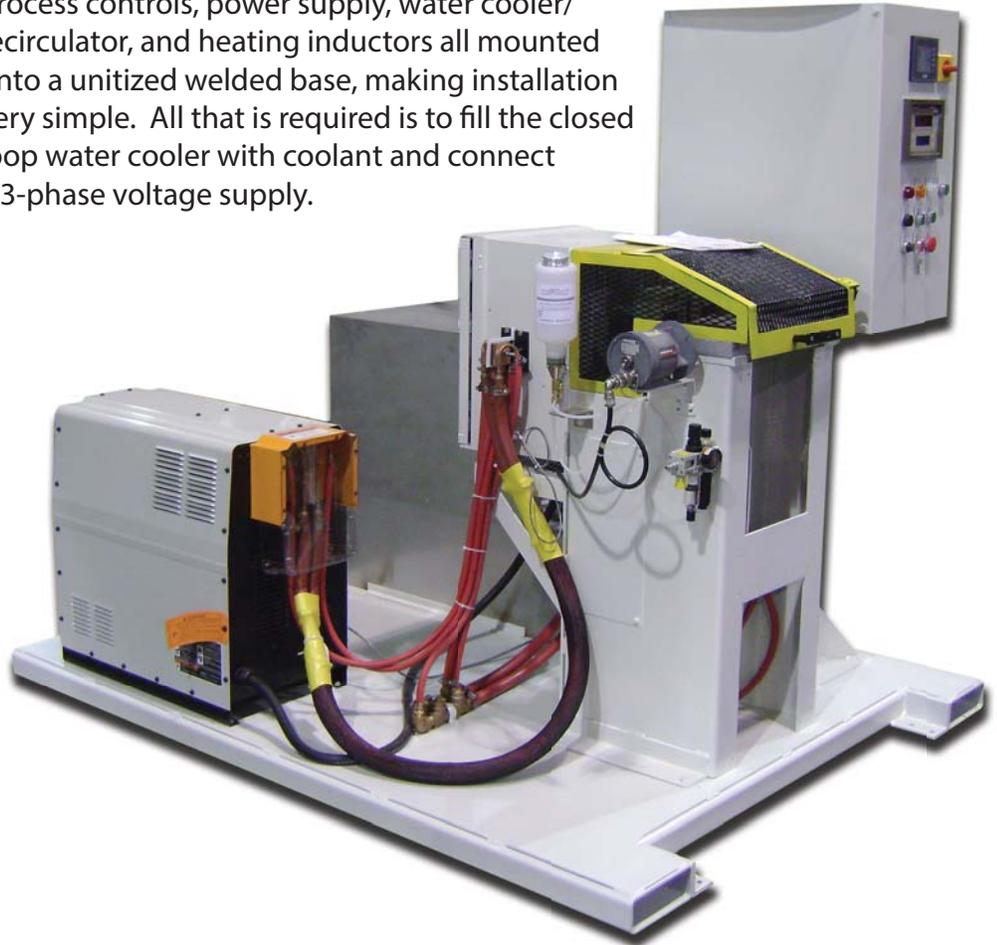

Closed Loop IR Temperature Control

Quick Change Inductors and Part Holders

Ajax TOCCO Magnethermic, the World leader in the design and manufacture of induction heating products offers a compact unitized bar-end heating/ forging system. The system is complete with process controls, power supply, water cooler/ recirculator, and heating inductors all mounted onto a unitized welded base, making installation very simple. All that is required is to fill the closed loop water cooler with coolant and connect a 3-phase voltage supply.

Ajax TOCCO Magnethermic's 35kW air cooled induction heating power supply is capable heating up to 115kg of steel per hour based on an 1100C temperature rise. Additional power supply offerings are available for varying production demands.
